This is what we do.

We have been setting standards in share register management since 1991. NIMBUS AR is a high-performance, all-in-one solution that includes a direct link to SIX SIS AG and ensures a proficient, modern share register administration process.

Nimbus is ISO/IEC 27001:2022 certified. Our proprietary technology is developed in-house and hosted on our own infrastructure in Switzerland. That is how we guarantee top-notch information security, quality and efficiency.

You can either manage your own share register using NIMBUS AR or entrust this task to us.

Our team of experts will manage your share register with utmost precision and daily updates, providing tailored reports and helping you to communicate with your shareholders.

You can rely on Nimbus completely, just like more than 150 satisfied customers do.

Interested in managing your share register with us?

**I will be delighted
to assist you!**
