

# NIMBUS GV®

For physical, virtual or hybrid  
Annual General Meetings

contributes to strengthening  
shareholders', investors',  
analysts', and the public's trust

helps to actively cultivate  
corporate image

makes voting and election  
results available precisely  
and in no time

ensures secure, legally  
compliant and efficient  
general meetings

enables implementation of  
physical, virtual and hybrid  
general meetings

***Our own voting devices and  
a purpose-built, proprietary  
radio network allow us to deliver  
precise voting and election  
results in just a few seconds.***

Ronald Stutz  
Head of ICT

## ***This is what we do.***

The general meeting is a public limited company's hallmark. A perfectly orchestrated AGM strengthens trust in its Management and is regarded as a mark of good corporate governance.

Every year, we assist approximately 70 companies in organizing and conducting their physical, virtual or hybrid Annual General Meeting.

NIMBUS GV is a comprehensive service package combining expertise, technology, experience, and commitment. We assist you with your project planning by providing technical equipment and facilitating access control in physical or digital spaces. Every year we send out one million invitations, process more than 150,000 returns and prepare our electronic voting system for approximately 25,000 guests.

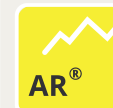

## ***Interested in organizing your AGM with us?***

**I will be delighted  
to assist you!**
